

For this term please look at the chart below and choose a homework task that you would like to do over the weekend. Tick off what you do, so that each week you can choose a different task.

<p>Can you use the number line attached (Feel free to take it out and use it) To make up and work out some addition and subtraction problems. For an extra challenge you could add or subtract three digits or try a missing number problem. Eg $7 + 6 + 9 =$ or $24 - \underline{\quad} = 18$</p>	<p>Look in a book and find words with digraphs or trigraphs we have learnt. Copy out the words into this book and draw the sound buttons to show the single sounds and the digraphs. Eg knight</p>
<p>Can you do an observational drawing of your house? Use a ruler and look carefully at the size and shape of things to make sure your drawing is accurate.</p>	<p>Can you write some sentences to tell us what you have been doing over the weekend? Try to use 'ed' endings on words. Make sure that your capital letters are bigger than other letters.</p>
